

1. GASTROGEL

HIPPOVET+

Gastrogel supports the treatment of difficult-to-heal gastric (and duodenal) ulcers and helps maintain a healthy mucosa in horses after pharmacological treatment, reducing the risk of disease recurrence. This product can be used long-term as a preventive measure because it does not change the pH of the stomach and therefore does not affect the digestion and absorption of nutrients.

2. "OZONE HORSE" HYDRO OZONE THERAPY SYSTEM

Ozone Horse Konrad Pawłowski

Ozone Horse – intended for treatment, rehabilitation and biological regeneration of: tendons, muscles, ligaments, attachments, tendon capsules, joint capsules in horses. It is used for the treatment of damage and inflammation of muscles, tendons, ligaments, attachments, tendon and joint capsules, for bursitis, for rehabilitation after injury, for the treatment of laminitis, for maintaining the high condition of horses during competitions, for biological regeneration after hard work and transport.
