

1. BIO Universal substrate

SIA SILUFLORA

A substrate that consists of 100% natural ingredients and was produced using special technology only from materials that can be used in organic farming. Contains no animal products. BIO UNIVERSAL SUBSTRATE is a specially prepared substrate designed for the ecological cultivation of all vegetables and flowers. It can be used for growing tomatoes, cucumbers, peppers, zucchini, pumpkins, lettuce, as well as geraniums, nasturtiums, marigolds and many other vegetables and flowers. This is a product composed of 100% natural ingredients. The soil is perfect for field crops, under cover and in the garden. It also serves as an additive improving air-water relations in the soil, enriching and loosening it.

2. COMPO COMPLETE

COMPO / COMPO POLSKA Sp. z o.o.

COMPO COMPLETE is an innovative series of plant care products that are characterised by universality and simplicity of use, the highest quality and effectiveness and modern design. The motto of the series is 'OUR BEST,' which clearly indicates that these products are the best choice, and the complete recipe of these products guarantees excellent plant care.

3. Swing table

Four Dukes / STAMECO Sp. z o.o.

The table-swing hybrid is an innovative and functional piece of furniture that combines elements of a traditional table with swing seats. It is a unique structure for terrace or garden furniture, as well as an interesting decorative element that can become the central attraction in the space. It is a perfect solution for those who value a creative approach to furnishing their surroundings and, at the same time, want to create a space to spend time together in a unique way.

4. A product line of peat-free substrates for growing plants dedicated to the cultivation of perennials, grasses and herbs.

ATHENA ECO GROUP Sp. z o.o. Sp. k. Bio-Produkty Sp. z o.o. PEAT – BARK – PALLETS

Peat-free substrates for growing plants are ready-to-use products that take into account the specific needs of plants while respecting environmental protection principles. They ensure stable maintenance of plants in the ground at various stages of their growth. They effectively manage the water and nutrients contained in them, even during long periods of cultivation. The high humus content creates excellent conditions for the growth and development of plants from the emergence phase to full maturity.

5. Wokas Naturalnie Soil Package

WOKAS SA

This is the only such product on the market. The effects of using the Wokas Naturalnie line have been confirmed in our own tests and those carried out at the Institute of Horticulture in Skierniewice. In order to meet the expectations of modern consumers, reduce CO2 emissions, protect the environment and further follow the trend that already exists in the West, we have created soil without the addition of peat. We are proud that we managed to start cooperation with the Biebrza National Park. The purpose of the Park is, among others, protection of the Biebrza Marshes, which are considered one of the most important refuges for wetland birds in the country and Central Europe. As part of the protection, maintenance is carried out in the Park, as a result of which very large amounts of biomass unsuitable for agricultural use are obtained. As part of the cooperation, the Wokas company undertook the management of these problematic materials and, as part of recycling, began to produce peat-free garden soil.

6. BOSMAN RASPBERRY tomato

PlantiCo - Hodowla i Nasiennictwo Ogrodnicze Zielonki Sp. z o.o.

Medium early variety (from planting seedlings to harvesting approx. 80 days), fertile, for field cultivation. The stalk has no elbow and detaches well from the fruit. Cylindrical and oval fruit with a 'beak,' raspberry-coloured, hard, 2-3 chambers, weighing 70-100 g. Blood-red flesh, very tasty. Extract content - 5.0 - 5.5o Brix. The variety is intended for large-scale cultivation, as well as for amateur cultivation for direct consumption and processing. Currently, it is the only raspberry tomato variety on the Polish market that is suitable for mechanical harvesting.

7. QGesto Garden Kitchens

QGESTO sp. z o.o.

The QGesto garden kitchen is a product that distinguishes your unique style and taste. This is a solution for people who appreciate comfort, luxury and excellent quality. It is a harmonious combination of kitchen, barbecue, home cinema and outdoor meeting space, meeting the most demanding expectations. This is your entertainment centre all year round, regardless of the weather.

8. Honda Miimo HRM4000 Live robotic mower

Honda / ARIES POWER EQUIPMENT Sp. z o.o.

Discover the Honda Miimo HRM4000 Live robotic mower from a manufacturer awarded the Gold Medal and the Grand Prix of the Gardenia Fair. It's not just a lawn mower, it's your personal gardener working 24/7. Equipped with advanced technologies such as satellite navigation and automatic narrow passage control, the Honda Miimo robot will take care of your garden while keeping your garden free of exhaust fumes. Gain more time for yourself and enjoy a beautifully kept lawn without any effort!

9. TURBO LAWN Fast-acting fertiliser

COMPO / COMPO POLSKA Sp. z o.o.

The TURBO LAWN fast-acting fertiliser is a specialised solution intended for fertilising all types of lawns. A balanced mixture containing over 75% of organic ingredients and the addition of minerals guarantees quickly visible and lasting effects within a few days. The addition of live mycorrhizal microorganisms improves water uptake, especially during dry periods. The fertiliser contains all the necessary nutrients that ensure a hard-wearing, healthy and dense lawn.
